

From Idea to Deployment: AI Tools Workshop for Future Innovators

Empowering Students to Build Real-World AI Applications Without Coding

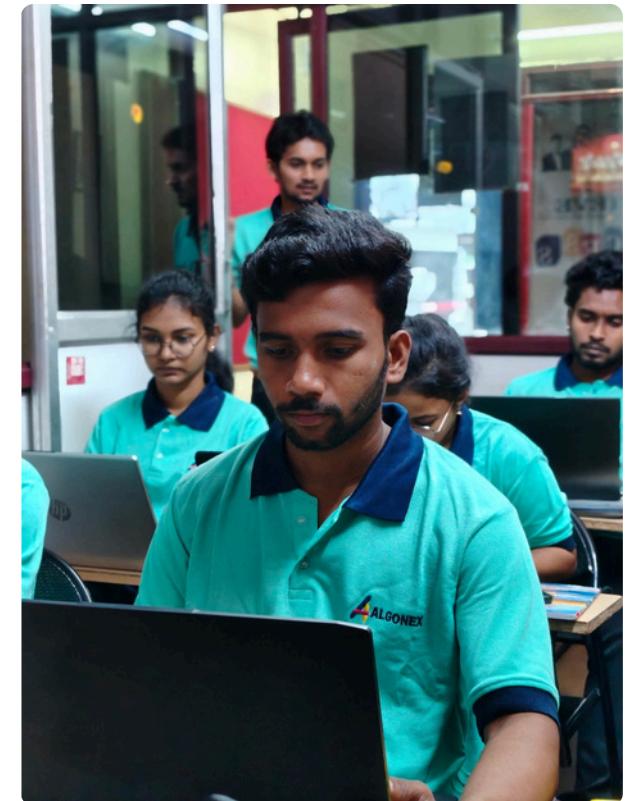

Presented by **Algonex IT Solutions**

Partnering to Prepare Students for Tomorrow

We're proposing a collaboration to bring cutting-edge AI education directly to your campus through our **Gen AI Tools Workshop**. This hands-on initiative is designed to bridge the gap between academic learning and industry demands.

As part of Algonex's **Industry- Academia Partnership Program**, this workshop equips students with practical skills in AI-assisted development, preparing them for the rapidly evolving job market where AI literacy is no longer optional - it's essential.

Why This Collaboration Matters

AI is Transforming Every Industry

Students need hands-on exposure to no-code AI tools to stay competitive in the modern workforce.

Bridge the Skills Gap

Close the divide between academic curriculum and real-world industry requirements through practical workshops.

Enhance Your Institution

Boost placement readiness, deliver cutting-edge learning, and gain recognition as an AI Partner Institution with Algonex.

Workshop Overview

From Idea to Deployment: Building AI Applications Without Coding

Duration: Flexible 1-Day or 2-Day Format

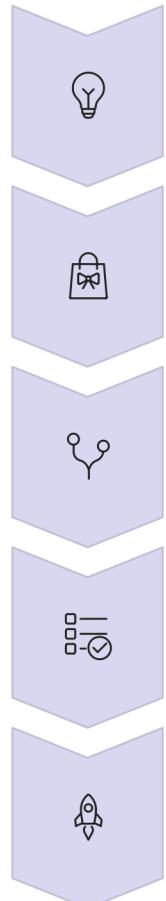

Organized by: Algonex IT Solutions

Ideal for: Degree, Engineering, and MCA Students

What Students Will Experience

- Complete project lifecycle from ideation to deployment
- Real-world case study: AI Resume Optimizer
- Live demonstrations of industry-grade AI tools
- Hands-on building without traditional coding

The Complete AI Development Journey

Idea Generation
Brainstorm and validate concepts using AI research tools

Interface Design
Create professional prototypes with AI design assistants

Feature Building
Develop functionality through AI-powered white coding

Testing & Automation
Validate and automate workflows efficiently

Live Deployment
Host and showcase working applications online

Each phase demonstrates how AI tools accelerate real-world development workflows, giving students the confidence to build production-ready applications.

Powerful AI Tools Students Will Master

Ideation & Research

ChatGPT(GPT-5),Perplexity, Grok ai, Gemini, Copilot for brainstorming and validating project concepts

Design & Prototyping

Uizard,GoogleStitch,relume.io, Figma AI for creating professional interfaces

Development & White Coding

LovableAI,ReplitAI,Bolt.new,Emergent ai, Rork ai for building functional applications without traditional coding

Backend & Automation

Make.com,Claude,Zapier,Firebase AI, Supa base for connecting services and automating processes

Deployment & Hosting

Vercel,Netlify,Flowise,GitHub Copilot for launching live applications to the web

Live Project: AI Resume Optimizer

A Complete AI Project Demonstration

Students will see a fully functional AI application built by Algonex IT Solutions that showcases the entire development lifecycle in action.

Key Features Demonstrated

- Resume upload and intelligent parsing
- ATS score analysis and optimization
- Role-specific recommendations
- Hiring insights tailored for freshers
- Professional resume download output

What Students Will Gain

AI-Powered Development Skills

Master the complete workflow from ideation through prototyping to live deployment using industry-standard AI tools

Industry-Ready Confidence

Build real applications and gain the practical experience needed to stand out in technical interviews

Professional Portfolio Projects

Create showcase-worthy projects that demonstrate hands-on AI capabilities to potential employers

Certification & Opportunities

Receive workshop certificates and gain access to internship opportunities with Algonex IT Solutions

Benefits for Your Institution

Enhanced Placement Outcomes

Students with practical AI skills are significantly more competitive in the job market, improving your placement statistics

Academic Recognition

Build your institution's reputation as a forward-thinking AI Partner Institution committed to cutting-edge education

Future-Ready Graduates

Equip students with the literacy and hands-on skills that modern employers actively seek

Ongoing Partnership with student membership

Access recurring workshops, hackathons, and internship programs with featured placement on the Algonex Partner Network

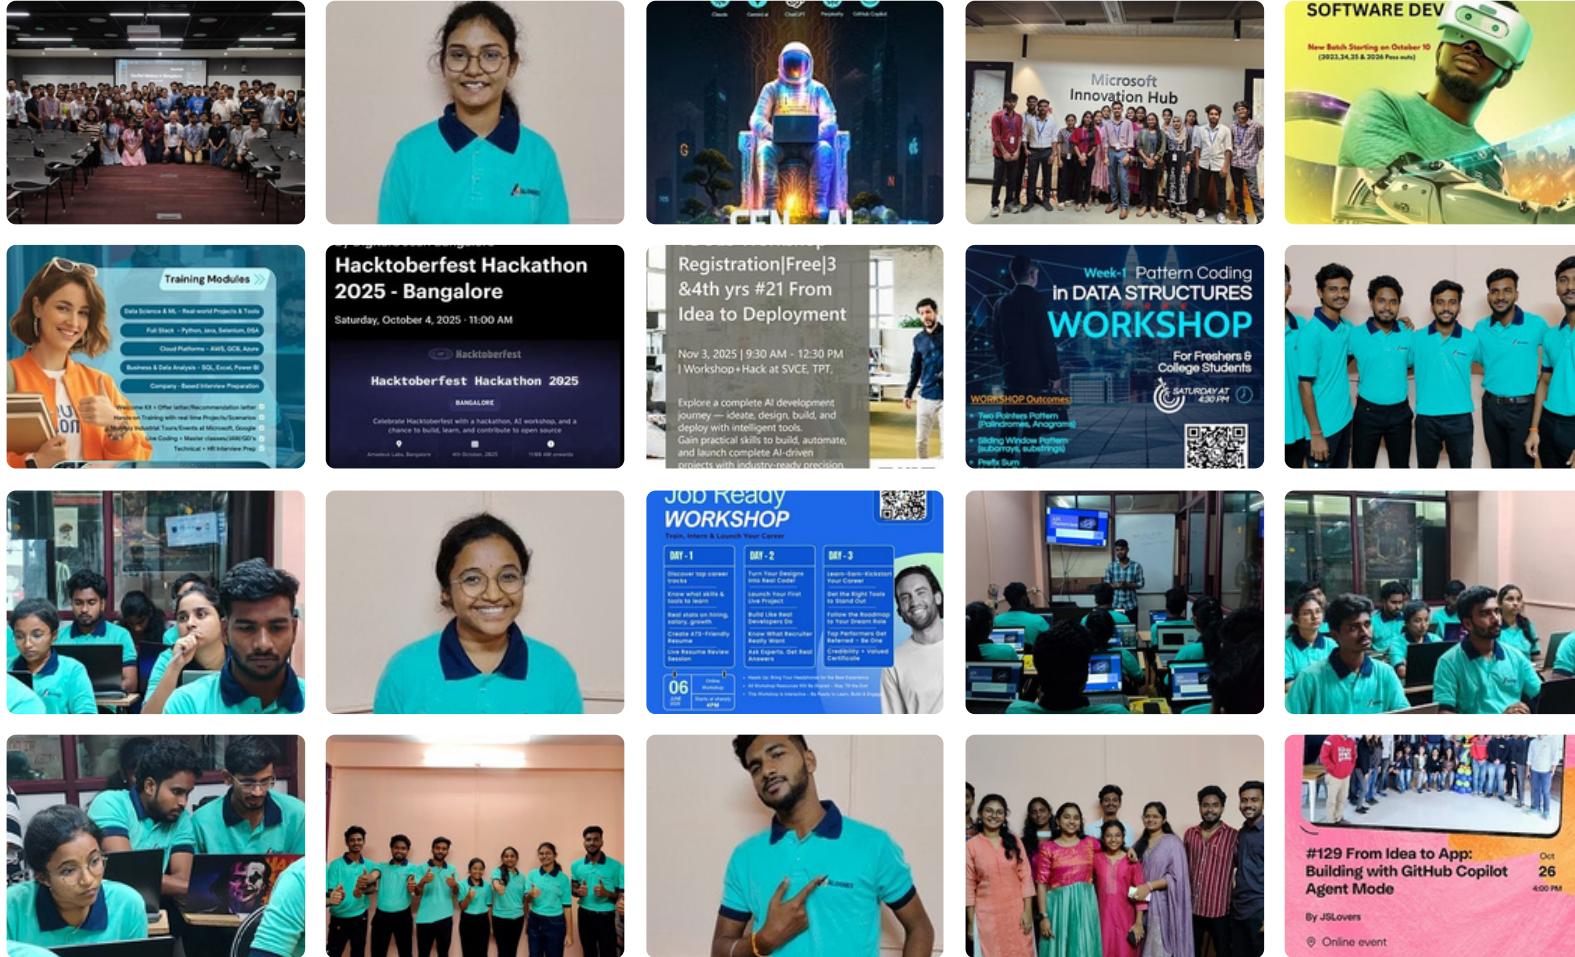

Our Journey So Far: Achievements & Impact

Explore a visual recap of our key milestones, successful tech events, and the significant impact we've made in empowering future innovators.

Moments of Impact: Our Tech Event Showcase

A visual journey through our vibrant tech events, workshops, and hackathons, showcasing the energy and innovation of future AI leaders.

Let's Build the Future Together

About Algonex IT Solutions

We're a tech-driven training and project development company committed to bringing AI-powered learning experiences directly to educational institutions.

Our Offerings

- Job-ready AI internships and training programs
- Real-time project development workshops
- Industry hackathons and competitions
- Comprehensive AI-based skill development

Ready to collaborate? Contact us to bring Gen AI learning to your students. Flexible 1-day or 2-day workshop formats available.
